WANT TO LOSE $1,500 TO $10,000 PER DAY?

IT'S EASY! JUST LET SB213/HB457 BECOME TENNESSEE LAW, THEN:

- **Share your Internet connection, or connect a PDA to the Internet without your service provider's *written* permission**
- **Use a Tivo or similar device without your cable company's okay**
- **Do dozens of things with your PC or TV you thought were legal**
- **Write, *or possess writings,* about how to do any of these things!**

SB213/HB457, soon to be voted on by the TN Senate Judiciary Committee, will give control over many things you do digitally to your ISP and your cable company, along with the authority to levy fines of $1,500 to $10,000 *per violation, per day, per device*. They say they won't abuse this power—*so why do they want it?*
